

WARWICK

Care Label 4 – Non Pile Fabric Soil Resistant Treatment

Regular care (weekly)

- Vacuum regularly using low suction
- Rotate reversible cushions regularly
- Protect from direct sunlight

Cleaning

Do not remove cushion covers for separate cleaning or washing, even though they may have zippers. Clean with hot-water extraction machine (hot). Professional cleaning recommended. Do not wet filling. Dry in shade away from direct heat. Allow to dry thoroughly before re-use. Re-application of soil-resist treatment may be necessary.

Spot cleaning

Treat spills and stains as soon as possible. Gently scrape any soil or mop any liquid from the surface of the fabric. Apply proprietary cleaning agents strictly according to instructions to remove the residue of the spill. Do not saturate the fabric or interior with water or other cleaning liquids. May be spot cleaned with dry cleaning solvent.

Annual professional cleaning recommended.

CAUTION: Secondary applications of stain repellent treatments may affect the performance of some pre-treated fabrics. Please test on inconspicuous area before applying.

Pilling

Can occur occasionally as a result of normal daily wear and should not be considered as a fault. Fibre pills can be removed by a battery operated pilling tool available from most haberdashery stores.
