

WARWICK

QUIET FIELDS, STRONG LINES, A SOPHISTICATED NEW NARRATIVE – WREN by Warwick

More than a stripe, WREN is a narrative of texture and place where its design recalls the measured simplicity of traditional cloth, reinterpreted with a refined hand. Feeling familiar, contemporary farmhouse is woven with a sophisticated rhythm capturing the grounded ease of country life and timeless quality.

- **DESIGN:** Grounded in a classic country aesthetic, this collection brings a heritage sensibility through a series of mix-and-match stripes and its coordinating plain HARLEY. Each stripe design is built on a neutral, softly toned base and elevated with a contrast chenille yarn for organic dimension. SAWYER re-imagines the timeless ticking stripe with its mottled character derived from a chenille yarn woven through its colourways, while WREN captures a farmhouse feel through its considered balance of colour and negative space with a bolder hand-stitched stripe for a familiar, homely look. Completing the trio, ARLYN draws on herringbone tradition, translating its rhythm into a textured stripe with sectional composition.
- **APPLICATION:** For those seeking a classic and adaptable design solution that will flex throughout interior styles such as shaker, coastal, English country and rustic modern, the WREN collection will effortlessly deliver for use in commercial and domestic spaces. With the ability to offer a refinement with heavy commercial durability, WREN is ideal for application on mass in busy zones or can transition seamlessly into bespoke residential furniture curations.
- **COLOURWAYS:** Presented across eight refined colour groups, WREN explores a sophisticated take on primary hues, softened into muted, liveable tones. Canola yellow, warming terracotta, earthy green and classic blue are tempered by complementary greys and a natural base tone, creating a palette that feels balanced yet versatile, these colours allow WREN to flex seamlessly across interiors from subtle statements to confident contrasts.
- **RATING:** Yarn dyed, Heavy Commercial rated with Oeko-Tex certification and an AS1530.3 fire rating.
