## SOPHISTICATED HAMPTONS ELEGANCE FOR A CASUAL SPACE- ELSIE by Warwick

**OVERVIEW:** Get a relaxed, coastal look with the Hampton inspired, ELSIE. Stylish, washable and designed in the Warwick studio, ELSIE has a comprehensive range of designs and their cotton blend construction creates a relaxed yet sophisticated aesthetic suitable for drapery and upholstery, in both modern and traditional residential interiors.

- **DESIGN:** In five transitional jacquard designs, ELSIE's dry, yet, soft and subtle textured appearance creates a comforting aesthetic and adds warmth to a residential space. ELIJAH is a classic, staple stripe. CADEN is a core plain, made to be styled with any of the patterns within the collection. AIDEN, a clean lined ogee with a traditional lattice design that creates a paired back decorative option. Modern floral FRANCES offers a contemporary multi-directional design suited to a multitude of applications. And lastly ELSIE, the most decorative floral option in the range - its slight Jacobean aesthetic gives it a unique flare making it the hero of the collection.
- **APPLICATION:** ELSIE's natural fibre blend composition makes this fabric versatile in nature and easy to wash. Its modern take on traditional designs would suit coastal, and even country style interiors. Oeko-Tex certified ELSIE's feminine and organic aesthetic makes this collection ideal for drapery, sofas and occasional chairs, as well as homely cushions and lampshades.
- **COLOURWAYS:** In four traditional, nature inspired colourways, ELSIE features a coastal Ivory which is perfect for a Hamptons look, while Taupe brings warmth and a neutral option to the space. On the darker and cooler side, Graphite offers a strong and dramatic option, while Indigo brings a pop of colour.
- **RATING:** With Oeko-Tex certification, ELSIE is a soft and washable fabric that is suitable for a variety of uses, including window treatments, upholstery and slipcovers. Designed in the Warwick studio, ELSIE's decorative designs and light and dark colourways allow for endless options to be created.
