## CHROMA COUTURE: A TACTILE AND COLOUR ENRICHED MOMENT – INVERLOCH by WARWICK

INVERLOCH combines the harmony of hues with textural accents to create a perfect drapery aesthetic with sophistication and elevated, pigmented tones.

- **DESIGN:** Focusing on the sustainable production of textiles, the INVERLOCH collection contains recycled fibres making it part of Warwick's ENCORE range. Constructed with a subtle cross-hatched style, the threads create a textured fleck, giving INVERLOCH a beautiful, informal effect.
- **APPLICATION:** Available as a continuous, 300cm wide solution, INVERLOCH has a relaxed simplicity that will be its own feature while seamlessly providing practicality with a design connection to its surroundings. A texturally contrasting style that mimics the raw beauty of organic materials, INVERLOCH has a composition that will hang with causal refinement.
- **COLOURWAYS:** The colours of INVERLOCH draw from nature with soft sands, pastel pinks and cloudy greys, each one a delicate representation enhanced with elevated, pigmented tones of Terracotta & Navy. The randomised formation of threads emphasises each colour highlighting its texture and adding dimension to a palette that is soft, light and enchanting.
- **RATING:** Oeko-Tex certified with an AS1530.3 fire rating.
