## HAMPTONS MEETS MODERN SOPHISTICATION - MACKENZIE by Warwick

Get an eclectic Hamptons inspired look with MACKENZIE. Designed in the Warwick studio for a modern and relaxed aesthetic, MACKENZIE is a dual-purpose, transitional and timeless collection that offers sophisticated designs that will suit a myriad of moods and styles for both classic and urban residential interiors.

- **DESIGN:** In four transitional designs, MACKENZIE is digitally printed on our dry, yet, soft, piece dyed KEYLARGO in Oatmeal, creating the perfect basecloth and canvas — its textured weave structure adding dimension to each pattern, as well as visual interest. The exclusive patterns featured in this collection create refined looks, with MABEL offering a herringbone zigzag; MACAULAY, bringing a striking multi-directional geometric key design to the range; MIRREN, a classic, uniform regent stripe; and MACKENZIE, a large-scale floral that channels and brings a touch of Jurassic foliage into the mix.
- **APPLICATION:** Dual-purpose and washable with versatile designs, MACKENZIE brings a modern and sophisticated take on the traditional coastal and Hamptons look, through to country style interiors. Oeko-Tex certified with Halo easy-clean benefits, MACKENZIE's sharp and clean aesthetic makes this collection ideal for sofas and occasional chairs, as well as homely cushions and lampshades.
- **COLOURWAYS:** In three classic colourways, MACKENZIE's colour groups complement each design, creating a timeless palette. Delft is a classic Hamptons blue that is perfect for a coastal inspired look, whereas Natural features soft, serene colours that draw inspiration from a vintage palette. For a darker option, Charcoal offers a refined and sophisticated style, ideal for creating a clean and neutral aesthetic.
- **RATING:** With Oeko-Tex certification and Halo easy-clean properties, MACKENZIE is a soft, washable and easy to clean fabric that is suitable for a variety of upholstery applications. Diverse, MACKENZIE's graphic designs and timeless colourways allow for an array of moods and looks to be created.
