

WARWICK

UNITING THE INDOOR AND OUT - NANUYA by Warwick

Overview: A dual-purpose outdoor fabric, our NANUYA collection brings a selection of classic patterns to our SunDec brand. This transitional offer gives users a range of reversible designs in tones from bold to neutral. NANUYA extends our outdoor brand to help make the likes of alfresco style indoor-outdoor living effortless.

- Inspiration: Three timeless patterns create simple and sophisticated design. YASAWA offers a small-scale geometric lattice, creating staple symmetry. MATACAWA features a bold and brilliant basket weave for two-tone, textural interest. Finally, NANUYA is a classic leaf-trail that brings a touch of nature to this collection.
- Design: NANUYA is a jacquard weave made from 100% polypropylene. This fabric has a dry and textured matte finish with a tailored and tactile feel. Featuring easy-clean Halo properties and anti-mildew treatment, our NANUYA collection offers the flexibility and freedom to create your own unique style, inside and out.
- Application: This range is dual-purpose, bleach-cleanable and fire rated - suitable for drapery, cushions and upholstery in general domestic environments. Its mix and match style and reversible colourways make NANUYA a fantastic option to add visual interest that has the ability to blend interior and exterior spaces together.
- Colourways: NANUYA's look and feel is dictated by its colourway. With eight reversible options, this collection has the ability to create a variety of moods. Hues of Hibiscus, Lobster, Palm and Reef bring playful feelings that add bright and bold colours to the collection. For subtle, sophisticated statements - Sand, Gull, Marine and Basalt create a more refined and modern feel.
- Rating: With a AS1530.3 Fire Rating and Oeko-Tex certification, NANUYA brings a selection of perennial designs to our SunDec outdoor range. Bleachable with an anti-mildew treatment, these patterns offer mix and match, eclectic capabilities to create your own style with easy-clean Halo properties.
