

WARWICK

SOPHISTICATED TEXTURE FOR TIMELESS APPEAL - TYSON by Warwick

Overview: The TYSON range presents a refined urban feel, achieving the perfect balance between a natural and organic feel without losing the sophisticated high-end look. Coloured in our Melbourne studio, TYSON is a texturally pleasing drapery offer perfect for cushions, and roman blinds alike.

- Application: TYSON, TRAVIS & TALBOT are for the customer that is looking for a textured timeless look. The subtle texture and understated elegance of the range lends it to be perfect for cushions, drapery, roman blinds as well as bedspreads.
- Design: TYSON a linear stripe matches perfectly with textured plain TRAVIS, which brings a natural organic element. TALBOT offers a cross-hatched plain that is transitional and adaptable for a multitude of settings.
- Colourways: With five colours in total, the TYSON range is made up of carefully considered neutrals. From the subtle natural look of Ivory and Champagne, that adds a hint of warmth, to the sophisticated, refined style of Taupe and Frost, and concluding with the dramatic mood of Charcoal. Although succinct, there is a colour option available for those looking for understated texture.
- Rating: With a blend of Polyester and Cotton, the Oeko-Tex range is suitable for cushions, drapery, roman blinds and bedspread applications.
