

# WARWICK

## Care Label 9 - Viscose/Rayon Pile Fabrics

### Regular care (weekly)

- Protect from direct sunlight
- Vacuum regularly using low suction
- Rotate reversible cushions regularly

### Cleaning

Do not dry clean. Professional cleaning recommended.

Clean with hot-water extraction machine (hot). Clean only with water based shampoo or foam upholstery cleaner. Do not over wet. Use cautious rubbing while fabric is damp. Finish by orientating the pile in a consistent direction. Cushion covers should not be removed or laundered even though they may have zips. Do not wet filling. Dry in shade away from direct heat. Allow to dry thoroughly before re-use.

### Spot cleaning

Treat spills and stains as soon as possible. Gently scrape any soil or mop any liquid from the surface of the fabric. Do not rub harshly in concentrated areas.

### Annual professional cleaning recommended

### Soil resist treatments

Apply only water-based soil resist (fabric protector) treatments. Do not use solvent based products.

### Pilling

Can occur occasionally as a result of normal daily wear and should not be considered as a fault. Fibre pills can be removed by a battery-operated pilling tool available from most haberdashery stores.

### Shading

Orientation of pile fibres will be disrupted when sat upon, resulting in an apparently different shade on contact areas. This disruption of the pile fibres and consequent apparent colour change are inherent characteristics and should not be considered as defects.
